+91 9082056583 | sahilsawant182@gmail.com

Professional Summary

Full Stack Developer and AI Engineer passionate about turning ideas into fast, reliable, and intelligent digital products. Experienced in building AI-driven platforms, interactive dashboards, and automated systems that solve real-world problems with clean architecture and thoughtful user experience.

Skills

Languages:

Python, JavaScript,
TypeScript, SQL

Frameworks:

React, React Native, Node.js,
Express, Flask, FastAPI

AI/ML:

Computer Vision, OCR, Model
Training, LLAVA, Azure
Cognitive Services

LLM Tools:

OpenAI, Azure OpenAI,
Gemini, LangChain, RAG,
FAISS/Pinecone

Data Analytics:

Power BI, Tableau, Retool,
Google Analytics, Dashboards

Databases:

MySQL, MongoDB

DevOps & Deployment:

NGINX, Docker, Git, CI/CD,
Vercel

APIs:

REST, WebSockets, SSR,
Microservices

Web Optimization:

SEO, Caching, Performance
Optimization

Soft Skills:

Problem-Solving,
Communication, Ownership,
Analytical Thinking

Education

Bachelor's in Artificial Intelligence and Data Science

Thakur College of Engineering and Technology, 2021-2024

Higher Secondary Certificate (HSC) : Science

Sathaye College, 2019-2021

Work Experience

Full Stack Developer – Thakur Educational Group

Jan 2025 to April 2025

- Engineered the official TGBS Mumbai website using SSR with Express.js, resulting in 90% faster initial load time and improved SEO ranking.
- Built a custom CMS with role-based controls, enabling non-technical staff to publish dynamic pages easily.
- Designed a responsive UI aligned with brand guidelines, improving user navigation and mobile experience.
- Deployed the platform on an NGINX server, configuring reverse proxy, SSL, and caching for smooth performance.

Tech Stack: Express.js, Node.js, MySQL, NGINX, HTML/CSS/JS, SSR, SEO, Git

Full Stack Developer – GRAIN Analytics (Canada, Remote)

May 2024 to July 2024

- Developed a full-stack operations platform using React + Python, improving data processing and user workflow efficiency by 25%.
- Built live dashboards with heatmaps, real-time charts, and Google API integrations to support data-driven planning.
- Integrated an LLM-powered chatbot to assist users with labor planning questions, reducing manual support workload.
- Optimized REST APIs and data pipelines, reducing data load times by 30-40% and improving frontend responsiveness.

Tech Stack: React.js, Python, REST APIs, Google APIs, LLM Integration, Data Visualization

AI/ML Intern - TRAAIN Circle Pvt. Ltd.

December 2023 to April 2024

- Built Mishraji, a GPT-4 powered AI chatbot across web and mobile using Python, React.js, and React Native.
- Trained 31 ML models (object detection + 29 category-specific classifiers) achieving improved detection accuracy for shelf analytics.
- Created a Retool dashboard integrated with Google Analytics to track performance and insights.
- Implemented Azure Speech-to-Text, Text-to-Speech, and custom voice models to enhance user interaction.
- Developed OCR and image-matching modules and integrated LLAVA for multimodal reasoning and summarization, boosting recognition reliability by 22%

Tech Stack: Python, React.js, React Native, Azure AI, Retool, OCR, LLAVA, ML

Projects

Fit Realm - AI Fitness Platform

<https://thefitrealm.in>

- Built an AI-powered fitness platform generating personalized workout plans, routines, and analytics using LLMs and RAG.
- Integrated Fit G, a real-time chatbot providing fitness guidance, form corrections, and daily coaching.
- Designed dashboards tracking fat %, muscle mass, calories, and weekly progression.
- Optimized SEO and performance, achieving 95+ Lighthouse score and fast-loading UI for better user retention.
- Deployed full production system with secure API architecture and efficient caching.

Tech Stack: React.js, Node.js, Python, LLMs, MySQL, Tailwind, NGINX, RAG

Portfolio Website

<https://sahilsawant.42web.io>

- Implemented GSAP and Framer Motion animations for smooth section transitions, micro-interactions, scroll effects, and dynamic UI elements.
- Optimized rendering pipeline, asset compression, lazy-loading, and animation batching - improving load time and runtime performance by ~60%.
- Applied SEO best practices (dynamic metadata, structured tags, OpenGraph, optimized DOM), resulting in significantly higher Lighthouse SEO scores.
- Created interactive demos including FitGenie LLM, showcasing real AI capabilities directly in the browser.

Tech Stack: React.js, GSAP, Framer Motion, Flask (backend), LLMs, Web Performance Optimization, SEO
